Professional Summary

Motivated Bachelor in Information Technology (BIT) student with hands-on Full Stack (MERN) internship experience and a strong foundation in software engineering principles. Proficient in web application development, RESTful APIs, and modern frameworks. Seeking a Software Engineer position or internship to apply technical skills, deliver scalable web solutions, and contribute effectively within a collaborative development team.

Technical Skills

Languages: Python, JavaScript (ES6+), Java, C++, C, PHP, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Django, Scikit-Learn, Pandas

Databases & Web Tech: MongoDB, MySQL, MariaDB, SQLite, REST APIs, JSON, WebSockets

Tools & Platforms: Git, GitHub, Postman, Figma, VS Code, Linux, Render, VirtualBox

Domains & Competencies: Web Scraping, Automation Scripting, SEO Optimization, Cybersecurity Fundamentals

Experience

Full Stack Developer Intern (*Remote*)

May 2026 – July 2026

Info and Techno Hub Pvt. Ltd.

Nepalgunj, Nepal

- Engineered end-to-end web features using the MERN stack (MongoDB, Express, React, Node.js) for high-availability web applications.
- Developed modular, responsive front-end components in React.js, optimizing user experience and page load times.
- Designed secure RESTful APIs with JWT authentication and middleware in Node.js/Express for dynamic data management.
- Collaborated asynchronously with cross-functional remote teams to conduct peer reviews, debug codebases, and ship features.

Projects

Real-Time Chat Application

[\[GitHub Code\]](#)

- Architected a full-stack real-time messaging application using React, Node.js, Express, MongoDB, and Socket.IO.
- Implemented low-latency bi-directional event handling for live typing indicators, user presence, and group messaging.
- Secured user data with JWT-based authentication and designed efficient MongoDB schemas for chat history persistence.

Emotion Aware AI ChatBot

[\[GitHub Code\]](#)

- Developed a context-aware conversational engine using Python, Flask, and Machine Learning algorithms.
- Processed and classified input text into 7 distinct emotional states using TF-IDF vectorization and Scikit-Learn classifiers.
- Integrated OpenAI and OpenRouter APIs to deliver dynamic, context-sensitive responses based on detected emotion.

Employee Management System

[\[GitHub Code\]](#)

- Built a modular Java desktop application with full CRUD functionality for administrative employee record management.
- Configured database connections ensuring real-time data persistence, query optimization, and error handling.
- Applied Object-Oriented Programming (OOP) principles (Encapsulation, Inheritance) to create clean, reusable architecture.

Education

Bachelor in Information Technology (BIT)

Expected Graduation: 2026

KIST College of IT, Purbanchal University

Kathmandu, Nepal

- Relevant Coursework:** Data Structures & Algorithms, Web Technologies, Database Systems, Software Engineering, AI +2 Science (Computer Science)

2020

Precious National College

Kathmandu, Nepal

Certifications

Soft Skills

Analytical Problem-Solving, Cross-Functional Collaboration, Technical Communication, Adaptability, Time Management
